COMPANY OVERVIEW

Nexaces LLC is a New Jersey software engineering firm. We design, build and support accessible public websites, portals and web applications for state, county and municipal agencies, and for prime contractors who need a certified SBE on their team.

CORE COMPETENCIES

- **Public websites and content management.** Agency sites on Drupal and WordPress with editorial workflow, review and approval.
- **Custom applications and APIs.** Permitting, licensing, case management and intake systems, and the APIs between them.
- **Accessibility audits and fixes.** Section 508 and WCAG conformance checked criterion by criterion, with remediation plans and VPAT documentation.
- **Data, reporting and dashboards.** Dashboards and reports for program staff and leadership, and open-data publication.
- **Headless frontends.** One backend serving several agency sites, so a content change is made once.
- **Support, maintenance and hosting.** Monitoring, backups, security patching and a named support contact.

WHY NEXACES

- Certified NJ Small Business Enterprise, counted toward SBE participation goals.
- We build and run our own production software, so we plan for the years after launch: Fictbase, a WordPress publishing platform for fiction authors, and Doodrio, an AI service that turns a written script into a finished video.
- Accessibility is part of the build from the first design, not an audit at the end.
- You work directly with the founder. We reply within one business day.

FOUNDER'S DELIVERY EXPERIENCE

Mihir Patel has more than 10 years of experience building web applications. From 2022 to 2026, as part of a prime contractor's delivery team, that work included:

- Statewide public benefits application
- State portal redesign on USWDS and Drupal
- Migration of a federal agency's web estate into a Drupal 11 multisite of eight hubs
- Agency portals on Salesforce across four states
- GenAI document assistant: React frontend on Java microservices

This work was delivered before Nexaces was established. It is listed as the founder's relevant experience, not as Nexaces past performance.

COMPANY DATA

LEGAL ENTITY

Nexaces LLC, a New Jersey limited liability company

NJ SBE CERTIFICATION

A0739-54, Category 1, active through September 21, 2031

NJSTART VENDOR ID

V00118262

NJ BUSINESS REGISTRATION

DLN I0000259327
